Apple publicly commit to work with Nvidia on drivers for Mac OS 10.14. 18,962 have signed. Let's get to 25,000! Fabian Bohorquez signed this petition. thorsten I believe Metal support was added in NVIDIA's Web Drivers a little while ago, but I wonder if that'll be the stumbling block in seeing new beta NVIDIA has not released an Apple-approved graphics driver for macOS Mojave. For more information, please see this official statement from NVIDIA on NVIDIA's Visit BLOG : <https://com-chris1111.github.io> Visit HMF : <https://www.hackintosh-montreal.com/forum> - chris1111/Fix-Old-NVIDIA-macOS-Mojave.. r/nvidia: A place for everything NVIDIA, come talk about news, drivers, rumours, GPUs, the industry, show-off your build and more.. Nvidia has put the final nail in the coffin for developer Nvidia GPU support on MacOS, officially calling an end to compatibility with its CUDA That's no fault of the MacBook Air, as it's a thin and light portable laptop built around maximizing battery life. In other words, it was never intended to be a gaming ...

The GPUs of Nvidia's rival, AMD, can't support CUDA, which has led to some video professionals relying on the macOS platform to grumble In order to run macOS Applications that leverage the CUDA architecture of certain NVIDIA graphics cards, users will need to download and But despite the reliance on AMD hardware Apple continued to support Nvidia GPUs. If you wanted to cram a Nvidia card into your older Mac Pro Nvidia GPU owners looking to run macOS 10.14 (Mojave) are locked out of doing so, even unofficially. It isn't at Click here to download the macOS version. Click here to download the Windows 7 x64/Windows 8.1 x64/Windows 10 x64 PC version.. When will the Nvidia Web Drivers be released for macOS Mojave ... Maybe the NVIDIA Drivers will be released in macOS 10.15 Catalina for Nvidia's decision to stop supporting macOS in CUDA isn't a major surprise given that, for some years, Apple hasn't included Nvidia GPUs in its Note: This webpage is a representation of NVIDIA's Apple Updater source, so will ... 387.10.10.10.40.134, macOS 10.13.6 High Sierra (17G11023), 63950151.. Those who have been following the saga of getting actual, real and official macOS drivers for what few NVIDIA CUDA graphics cards are still Apple publicly commit to work with Nvidia on drivers for Mac OS 10.05f02: Graphics driver updated for macOS Sierra 10. We have already covered an article with NVIDIA support for macOS honestly isn't hard for NVIDIA/Apple, given that they have a history. More so, it seems a political problem first, macOS 10.14 (Mojave) and later does not currently support CUDA so do not upgrade beyond macOS 10.13.6 if CUDA support is required.. Apple's macOS Mojave is a great software update for most users. But, it isn't for those who are using an ...
